

# WATERTRAP

## Moisture collector

### ■ PROPERTIES

DUROSTICK WATERTRAP moisture collector is an easy to use device that absorbs moisture. It uses special crystals that are placed in specially made breathable packaging. It reduces up to 40% of the excess moisture when placed in a closed off space. Its placement removes all unpleasant odors and does not favor mold, bacteria and microorganism growth. It prevents damage to electrical devices such as TVs, PCs, Hi-Fi, etc.

It keeps moisture-sensitive copper and brass items intact, as well as books, documents, etc.

Its placement in inhabited spaces, contributes to air quality and support people with allergies, headaches and rheumatic pains by reducing the indoor levels of humidity and/or moisture.

### ■ ADVANTAGES

- It regulates the relative humidity of the room to normal levels (40%-60%).
- Does not dry out the atmosphere.
- Works without electricity (can be placed anywhere).
- Easy to use and refill the crystals.

### ■ APPLICATIONS

DUROSTICK WATERTRAP produces exceptional results when used in spaces that are closed off or not often ventilated:

- Storage areas, basements, celars and lofts, attics.
- Vacation homes, motor homes, recreational boats, kitchen cabinets and closets.
- Heated indoor pools.

### ■ USE

- Remove the paper cover around the plastic container.
- Remove the lid/cover from the plastic container.
- Remove the plastic wrap carefully without damaging the net containing the crystals.
- Place the net containing the crystals on the grill inside the plastic container.
- Replace the lid/cover in its original position.
- After completing this easy assembly, wash your hands with plenty of water.

### ■ REPLACING THE CRYSTALS

- Once all the crystals dissolve completely, empty the container (into the toilet) .

The technical specifications and directions of use contained in this technical data sheet are the results of the knowledge and experience of the company's research and development department, as well as from the real-life applications of the product. The recommendations and suggestions regarding the use of the products are made without guarantee since the respective conditions during their application are beyond the control of the company. For this reason, it is the user's responsibility to make sure that the product is suitable for the intended application as well as the application conditions of the project.
