

DUROSTICK MOUSE TRAP

PROPERTIES

Mousetraps contain 2 plastic tablets. Ready to use, they consist of strong glue, odorless and special bait (they do not contain poison). The adhesive is ready for use and baited. It traps, with the method of direct immobilization, mice and rats, cockroaches, lizards and other unwanted visitors. It prevents their escape and rids them from any spaces where the trap is applied. It maintains its adhesive strength for a long time, without drying while it remains unaffected by exposure to moisture, water and heat.

APPLICATIONS

DUROSTICK MOUSE TRAP is applied quickly and easily, both indoors and outdoors, in inhabited or non-inhabited spaces, where the presence of mice or insects is identified. If there are no results within the next 2-3 days, simply move the trap in a different location.

USE

Place the baited traps in areas where mice or insects might pass.

CLEANING

In case of contact with hands or clothing, use white spirit or alcohol to remove it.

PACKAGING

Carton box containing 20 packages with 2 medium size traps each one Carton box containing 24 packages with 2 large size traps each one.

STORAGE

Store in tightly closed packaging, for at least 18 months from production date.

SAFETY DIRECTIONS

The product needs no hazard labeling under current European and National legislation. However, it is recommended to keep away from the

DUROSTICK MOUSE TRAP

reach of children. If swallowed, seek immediate medical advice and show the container or label.
